

Endoscopic Resection of Colorectal Neoplasia

Module 2: EMR Masterclass • 26 & 27 February 2020 • Svendborg, Denmark

Endoscopic Mucosal Resection (EMR) has emerged as one of the most important advancements in GI over the last 10 years. For established endoscopists, there have been no pathways to developing skills in this complex technique. The module II course program prepares endoscopists to overcome challenges, gain confidence and demonstrate their "readiness" to perform EMR. The course is designed to specifically teach standardized knowledge and motor skills in colorectal EMR. Enrollees will participate in a half-day of detailed introduction to EMR and a one-day of intensive, standardized, hands-on training.

Target group

The enrollment criteria described below is intended to give potential participants an idea of the basic skill levels expected of program participants, and the skills that are needed to successfully perform colorectal EMR.

Participating doctors should have:

- A minimum of two years in practice post-fellowship
- Performed at least 500 colonoscopies independently, and currently performing colonoscopy as part of daily practice
- · Proficiency in basic polypectomy, hemostasis, and injection techniques

Training course contents

- · Lesion Recognition
- · Submucosal Injection Techniques
- · Piecemeal and Snare Resection
- · Polyp Retrieval
- · Polypectomy Site Treatment
- Tattooing
- Perforation & Adverse Event Management
- · Communication Skills

Learning Objectives

After attending this programme, participants should be able to:

- Describe the morphology of colonic polyps and assess their endoscopic appearance for resectability.
- Appropriately select and demonstrate the use of various snares, cautery and injection/lifting technique in the endoscopic mucosal resection of "large, complex or high-risk" colonic polyps (e.g., > 20 mm, difficult location, with depression or significant nodularity).
- Demonstrate the use of appropriate accessories for both polyp retrieval and management of complications.
- · Select appropriate surveillance intervals based on current guidelines.

Course leaders

- Professor, Senior Surgeon MD Gunnar Baatrup
- Senior Surgeon
 Niels Buch
- Chief Surgeon
 Søren Meisner

Time & Place

The training course will be held 26 February from 15:00-19:00 & 27 February 2020 from 8:00-16:30 at OUH Svendborg Sygehus.

No of participants 6 participants

Price

DKK 1500 ex VAT per participant. This amount includes meals and training course material.

Registration

Register via: www.satccenter.com. Participants employed in the Region of Southern Denmark are exempted course fees according to the regions sponsorship of SATC Center.

Deadline for registration: 10 February 2020.

Contact: Education Secretary Lene von Fintel Sostack, mail: ouh.a.satc@rsyd.dk.

The training course is arranged in co-operation between SATC center, Department of Surgery, at OUH Svendborg and Olympus Danmark.

Participation in the course comply the guidlines of Region of Southern Denmark for participation of education

Program: Endoscopic Resection of Colorectal Neoplasia

DAY 1

15:00 - 15:30 Arrival

15:30 - 15:45 Welcome / Introduction of participants

15:45 - 16:15 Kahoot Quiz

16:15 – 16:45 Lecture 1: Indications / Lesion Recognition by Senior Consultant Søren Meisner

16:45 – 17:15 Lecture 2: Technical Fundamentals of EMR by Senior Consultant Niels Buch

17:15 – 18:05 Lecture 3: Post-Polypectomy Steps: Post-procedural care, Tattoo, Retrieval and Follow-up by Professor Gunnar Baatrup

18:05 - 18:20 Summary of the day

18:20 – Socializing

DAY 2

08:00 – 08:30 Arrival, preparation (change to OR dress)

08:30 - 12:00 Hands-on training (direct supervision)

12:00 - 12:45 Lunch

12:45 – 16:15 Hands-on training (direct supervision)

16:15 - 16:30 Summary of the day
